MATERIE PLASTICHE ESPANSE

Techniks

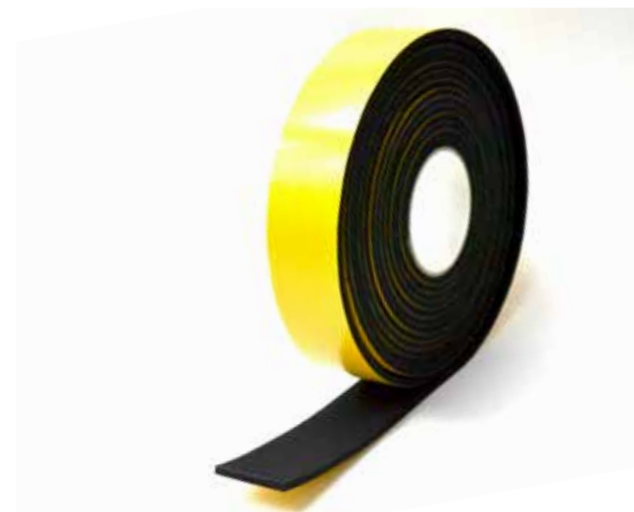

## Techniks by TecnoPlus®

Research with solutions

Design your technology or improve its capability. Our technical foams enable to develop products suitable for any need, such as: filtration, protection, process run and control. The customer has so a targeted choice, thanks to a wide range of materials, selected to offer the best performance, and to specific made-to-measure manufactures. Transpiring, special, insulating and elastomeric foams permit to satisfy the most sophisticated industrial applications.

## TecnoGum AIRBAND

### Adhesive mousse sealing profile

We produce custom made EPDM rubber foam gaskets with adhesive side for the companies. These items are entirely manufactured inside our factory and can be made also in PVC, PE and PUR.

Density	Temperature range	Hardness	Composition
110 kg/m <sup>3</sup>	- 40 / + 100° C	25-45 Shore 00	EPDM

## Air water filters

Over the years we have satisfied many necessities of filtration thanks to high quality raw materials. In particular, we manufacture custom filters for:

- aquariums
- air conditioning systems
- small engines
- coalescent filtration

We make every shape and size for any application.

Type	Application	Porosity range in PPI*
AirTec	air filter	10/20/30/45/60/75/90
WaterCell	water filter	10/20/30/45

\* number of pores per linear inches

## Magic Polish sponge

AcuTerm® sponges assure a high cleaning of metals, painted walls, plastic surfaces and much more, completely renewing the treated item. They easily remove spots, usury marks and marker signs from:

- boats
- sneakers
- leather car interiors
- metallic items
- several kinds of tile and floors, also painted walls
- fridges, electrical appliances, kitchen

### How to use:

Put the sponge in the water until it is completely wet (or rather under the flowing tap water). Squeeze it almost completely and use the sponge for cleaning. You will get a perfect result!

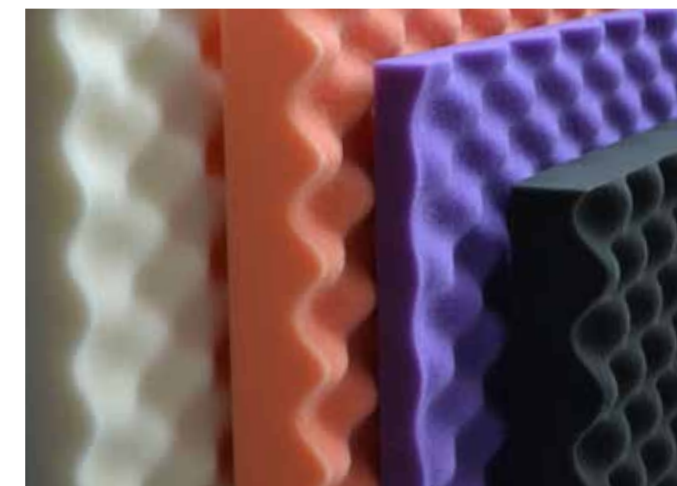

Type	Application	Size
Consumer product	mainteinance	custom made

## Die-ejection rubber

Sheets of natural or synthetic rubber offer high density and a superior resilience. They are produced in various thicknesses and are supplied for die-ejection plants and technical application.

Material	Color	Density	Cell
EPDM CR	black	130	closed
NR	red	on demand	open
NR	beige	on demand	open
NR	grey	on demand	open

## Polishing pads

We produce profiled sheet and specific shaped parts for industrial polishing. They are produced in TecnoPlus®, an expanded material with high resistance.

Material	Color	Density	Cell
TECNOPLUS®	custom made	from 30 kg/m³	open

## Technical packaging

Cioni S.r.l. produces a wide range of custom made inserts for containing fine products inside packaging boxes and protective cases.

Material	Height in mm	Format in mm
TecnoPe	from 2 to 100	1500 / 1200 / 1000 x 2000

## Protective panels for automotive

This system offers a set of shock absorption plastic foam panels including 4 pc. per box. Every panel has a washable side and an adhesive one for an easy application. They can be placed both horizontally and vertically. All our items are manufactured with self-extinguish material according to the main international regulations. Thanks to its unique features, this product effectively safeguards from the accidental damages caused by parking in small places, well protecting the doors, front and rear of the car. Custom made manufactures on request.

Dimensions in mm	Pieces per set
660 x 250 x 25	4
